The meeting was called to order by Director Etchepare. It was established that a quorum was not present so no voting could take place. H Uhden will e-mail everyone for a vote. Director Etchepare led the discussion about the rabies budget. Uhden reminded everyone that of the \$23,000.00 rabies budget, there is still \$11,246.98 left to encumber. He recommended \$3,000.00 be given to Game and Fish for Public Service Announcements. He said that the request from the Campbell County Predator Board was for a part-time rabies specialist.

B Schmidt from NRCS added their support for the position in Gillette. NRCS is going to test an urban skunk trap with a placebo bait to get a baseline number of urban skunks. The test area is Gillette. The purpose of this study is to develop a bait delered rabies vaccine that would work in the skunk population in the west.

D Staiger moved to fund the Campbell County position for \$9,000. D McCarron seconded.
